

ACECompo™ PETB

Introduction

ACECompo™ PETB Series are knitted composite comprising nonwoven geotextile with unilateral or bilateral polyester yarns.

The polyester yarns with high-strength perform the functions of reinforcement and the nonwoven geotextile performs the excellent capability of separation, filtration and drainage.

This product is used in increasing reinforcement of construction and repairing asphalt or concrete pavement, such as roadways, railways, and so on.

Applications

- Reinforcement of construction.
- Asphalt road repairing.
- Concrete road repairing.

Characteristics

- High-strength yarns.
- Excellent separation property.
- Outstanding capabilities of filtration and drainage.
